

Click End-Cap 3-pin PushDim

03/06/2024

SLC8514

Product description

Pushdim switch that clicks onto one end of the luminaire. A pre-connected end cap for 230V is also included, which is clicked onto the other end of the luminaire and locked with two screws. The Pushdim function should not be used if you have too many parts in your CLICK system. Then you may find that they end up "out of sync" when dimming. Should this happen, press and hold the pushdim switch for 20 seconds or until you see them synchronise. We recommend a maximum of approx. 10 pcs. CLICK luminaires/parts per pushdim. Instead, use a DALI dimmer art. no. S52000 + SL8512 if you exceed approx. 10 luminaires.
