

LED-strip COB RGBW 560 5m 14mm 16W 760lm 830 IP20

03/06/2024

S14069

Product description

LED strip designed to achieve consistent lines of light, even when using low-profile or transparent covers. RGBW refers to a multicolored LED strip that also incorporates white light. Create colorful and imaginative installations while also having the option to select neutral white light. This is suitable for projects that demand a uniform line of light, particularly those that are best addressed with smaller profiles. For instance, profiles carved into shallow panels.
